

GO FURTHER GO HIGHER

1:1 transitional support for autistic individuals aged 16-25 living in Croydon.

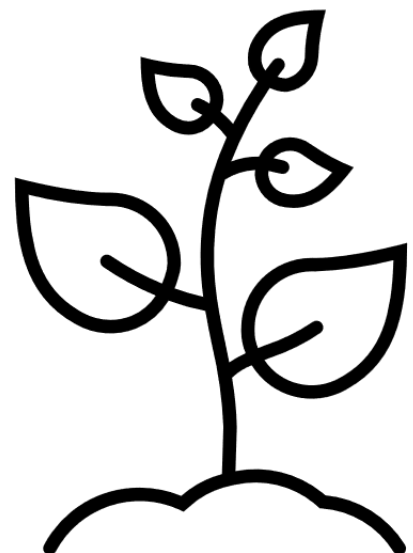

‘Go Further Go Higher’ offers emotional well-being support to young autistic individuals pre and post diagnosed. The project is aimed at offering practical support for young people, helping with transitions and engagement in education, employment, as well as supporting with decision-making, pro-social skills and regulation. We assist with exploring new environments, supporting with independent travel and creating and identifying spaces for young people to grow and flourish all while improving mental health and self-advocacy.

- **Build independence**
- **Access support and advice**
- **Set and achieve goals**
- **Explore your options**
- **Move forward with confidence**
